

We are ASAP

Our driving force is the automobile – our task is the development of future-oriented technologies. As a development partner to the automotive industry, the ASAP Group offers comprehensive services with a focus on the mobility of the future. As an independent subsidiary of the global player HCLTech, we combine stability with an innovative mindset. We are future-oriented and always have the latest technologies firmly in mind.

Benefit from our development expertise in the areas of electromobility, autonomous driving and connectivity. With our five service segments – Electrics/Electronics, Software, Consulting & Service, Test & Validation, Vehicle Engineering – our strategic development focus is on the future-oriented technologies of the automotive industry.

# get in touch

Any questions or projects that you would like to discuss? We'd love to share ideas and explore synergies with you.

## Consulting & Service

**We create  
success**

We provide support in interface and cross-sectional functions throughout the entire product life cycle. From project management to process development and communication strategy. Anyone targeting future success needs to have a clear strategy. We combine our experience in classic process and project management with agile development methods and know-how in automotive engineering. With this combination, we put projects on the fast track to success.
